Treaty Series 2498 - United Nations Office of Legal Affairs 2011-09-13
In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.

Online Film Production in China Using Blockchain and Smart Contracts - Patrice Pujol 2019-03-04

This book explores the use of Blockchain and smart contract technologies to develop new ways to finance independent films and digital media worldwide. Using case studies of Alibaba and in-depth, on-set observation of a Sino-US coproduction, as well as research collected from urban China, Hong Kong, Europe, and the USA, Online Film Production in China Using Blockchain and Smart Contracts explores new digital platforms and what this means for the international production of creative works. This research assesses the change in media consciousness from young urban audiences, their emergence as a

potential participative and creative community within dis-intermediated, decentralised and distributed crowdfunding and crowdsourcing models. This research proposes solutions on how these young emerging local creative talents can be identified and nurtured early on, particularly those who now produce creative and artistic audiovisual content whether these works are related to film, Virtual Reality (VR), video game, graphic novels, or music. Ultimately, a new media content finance and production platform implementing blockchain is proposed to bring transparency in the film sector and open doors to emerging artists in digital media. Appropriate for both professionals and academics in the film industry as well as computer science.

Boko Haram - C. Jonathan Ishaku 2009

The Situated Politics of Belonging - Nira Yuval-Davis 2006-06-27

This collection of essays examines the racialized and gendered effects of contemporary politics of belonging, issues which lie at the heart of contemporary political and social lives. It encompasses critical questions of identity and citizenship, inclusion and exclusion, emotional attachments, violent conflicts and local/global relationships. The range - geographically, thematically and theoretically - covered by the chapters reflects current concerns in the world today. A timely contribution to the ongoing debates in the field, it will be a valuable companion to scholars working in the areas of multiculturalism, globalisation and culture, race and ethnic studies, gender studies and studies of post-partition societies.

Confronting the Terrorism of Boko Haram in Nigeria - James Forest 2019-05-16

In this monograph counterterrorism expert James Forest assesses the threat Boko Haram poses to Nigeria and U.S. national security interests. As Dr. Forest notes, Boko Haram is largely a local phenomenon, though one with strategic implications, and must be understood and addressed within its local context and the long standing grievances that motivate terrorist activity. Dr. Forest deftly explores Nigeria's ethnic fissures and the role of unequal distribution of power in fueling terrorism. Indeed, these conditions, combined with the ready availability of weapons, contribute to Nigeria's other security challenges including militancy in the Niger Delta and organized crime around the economic center of the country, Lagos.

Research Methods for the DBA - Nathalie Mitev 2019-09-20

The thesis completed as part of the Doctorate in Business Administration, called the DBA, requires the candidate to choose from a wide range of research methods and tools so this project can become reality. Determining, choosing, implementing and contextualizing research methods and tools are all crucial steps for the success of the research work undertaken as part of the DBA thesis. The 30 chapters of this book have been prepared to the attention of DBA candidates, to orient and guide them in choosing research methods and tools. The first part raises the question of the choice of research methods; the second one deals with data collection methods; the third part focuses on data analysis methods; and the fourth surveys the contextualization of methods. Written so as to ensure contents are accessible and to foster learning, the chapters provide the foundations and resources to guide methodological choices. This book is the English augmented edition of the French edition published as

part of the Business Science Institute collection. The aim is to produce reference books to guide the academic work of doctoral candidates in the scientific training curriculum of the DBA. The first collective book published in 2015, *The Creation of Knowledge by Managers* (available in French), aimed to establish the main guidelines for this new role assumed by managers in management practice: that of new knowledge producers. Also part of the collection, the book *How to Successfully Complete Your DBA?*, aims to guide the research elaboration and execution of the DBA thesis.

The Tourist Gaze 3.0 - John Urry 2011-09-19

The Tourist Gaze, Third Edition restructures, reworks and remakes the groundbreaking previous versions making this successful book even more relevant for tourism students, researchers and designers in the new century. The tourist gaze remains an agenda setting theory, incorporating new principles and research. Packed full of fascinating insights this new edition is fresh and contemporary, intelligently broadening its theoretical and geographical scope and providing a nuanced account which responds to various critiques. The book has been significantly revised to include up-to-date empirical data, many new case studies and fresh concepts. Three new chapters have been added which explore photography and digitization, embodied performances, risks, and alternative futures. Innovative and informative, this book is essential reading for all involved in contemporary tourism, leisure, cultural policy, design, economic regeneration, heritage and the arts.

Handbook - 2005

Boko Haram - Mike Smith 2015-01-30

An insurgency in Nigeria by the Islamist extremist group Boko Haram has left thousands dead, shaken Africa's biggest country and worried the world. Yet it remains a mysterious - almost unknowable - organisation. rough exhaustive on-the-ground reporting, Mike Smith takes readers inside the conflict and provides the first in-depth account of the violence and unrest. He traces Boko Haram from its beginnings as a small Islamist sect in Nigeria's remote north-east, led by a baby-faced but charismatic preacher, to its transformation into a hydra-headed entity, deploying suicide bombers and abducting schoolgirls. Much of the book is told through the eyes of Nigerians who have found themselves caught between frightening insurgents and security forces accused of horrifying brutality. It includes the voices of a forgotten police officer left paralysed by an attack, women whose husbands have been murdered and a sword-wielding vigilante using charms to fend off insurgent bullets. It journeys through the sleaze and corruption that has robbed Africa's biggest oil producer of its potential, making it such fertile ground for extremism. Along the way it questions whether there can be any end to the violence and the ways in which this might be achieved. Interspersed with history, this book delves into the roots of this unholy war being waged by a virtually unknown organisation, which is set to shape the destiny of Africa's biggest economy and most populous state - and perhaps affect the future of Africa.

Olive Growing - 2010

Al Jazeera Phenomenon - Mohamed Zayani 2019-05-23

Few phenomena in the Arab world are more controversial than Al Jazeera - the satellite television news channel that, despite its brief history, has made its impact known throughout the world and changed the face of a formerly parochial Arab media. This timely collection of articles, many by Arabic-speaking scholars, gives us more information and analysis of the network - and how it has affected the public and even the foreign policies of Western governments - than any other of the very few books published in English up to now. The book provides rare insights into Al Jazeera's politics, its agenda, its programs, its coverage of regional crises, and its treatment of the West. The authors attempt to gauge the station's impact on ordinary Arab viewers, understand its effect on an increasingly visible Arab public sphere, and map out the role it plays in regional Arab politics. The image of Al Jazeera that emerges from this book is much more complex than its depiction in American media. It reveals the powerful role that the network plays in shaping ideas and reconstructing Arab identities during a crucial juncture in Middle Eastern history and politics.

Sustainable Tourism - Rob Harris 2012-05-16

Sustainable Tourism is vital reading for anyone seeking to understand the complexities associated with sustainable tourism development, and how government and industry have responded to the challenges the concept poses. The major areas addressed in this edited volume are: * perspectives and issues associated with the concept of sustainable tourism development * accreditation, education and interpretation, including specific examples such as Green Globe 21, the European Blue Flag Campaign and the WWF's PAN Parks Programme * sustainable tourism case studies of tourist destination regions, natural areas and tourism enterprises drawn from Africa, Australia, the South Pacific, North America, South-east Asia and the Caribbean An impressive international editorial team has combined to present in this text not only a variety of perspectives on sustainable tourism development, but also significant insights into barriers, challenges and current industry and government responses to it in various parts of the globe. 'Sustainable Tourism' will be a welcome addition to the libraries of tourism industry professionals, individuals involved in the management of natural areas; tourism policy makers; tourism academics; and students with an interest in the future sustainability of tourism and the industry that supports it.

Radio Spectrum Management - Haim Mazar (Madjar) 2016-08-29

This book presents the fundamentals of wireless communications and services, explaining in detail what RF spectrum management is, why it is important, which are the authorities regulating the use of spectrum, and how is it managed and enforced at the international, regional and national levels. The book offers insights to the engineering, regulatory, economic, legal, management policy-making aspects involved. Real-world case studies are presented to depict the various approaches in different countries, and valuable lessons are drawn. The topics are addressed by engineers, advocates and economists employed by national and international spectrum regulators. The book is a tool that will allow the international regional and national regulators to better manage the RF spectrum, and will help operators and suppliers of wireless communications to better understand their regulators.

IAMSAR Manual - International Maritime Organization 2002

Research in Organic Farming - Raumjit Nokkoul 2011-12-16

This book has emerged as a consequence of the difficulties we experienced in finding information when we first started researching. The goal was to produce a book where as many existing studies as possible could be presented in a single volume, making it easy for the reader to compare methods, results and conclusions. As a result, studies from countries such as Thailand, Spain, Sweden, Lithuania, Czech, Mexico, etc. have been brought together as individual chapters, and references to studies from other countries have been included in the overview chapters where possible. We believe that this opportunity to compare results from different countries will open a new perspective on the subject, allowing the typical characteristics of Organic Agriculture and Organic Food to be seen more clearly. Finally, we would like to thank the contributing authors and the staff at InTech for their efforts and cooperation

during the course of publication. I sincerely hope that this book will help researchers and students all over the world to reach new results in the field of Organic Agriculture and Organic Food.

The Rise of China vs. the Logic of Strategy - Edward N. Luttwak 2012-11-15

As the rest of the world worries about what a future might look like under Chinese supremacy, Luttwak worries about China's own future prospects. Applying the logic of strategy for which he is well known, he argues that the world's second largest economy may be headed for a fall unless China's leaders check their military ambitions.

Balinese Worlds - Fredrik Barth 1993-04

In *Balinese Worlds*, Fredrik Barth proposes a new model for anthropological analysis of complex civilizations that is based on a fresh, synthetic account of culture and society in North Bali and one that takes full notice of individual creativity in shaping the contours of this dynamic culture. In this detailed ethnography of the Northern district of Buleleng, Barth rejects mainstream anthropological generalizations of Bali as a cultural system of carefully articulated parts. Instead—drawing on many sources, including the sociology of knowledge, interactional analysis, postmodern thought, and his own exceptionally varied field experience—Barth presents a new model that actually generates variation. Barth's innovative analysis of Balinese life highlights both the constructive and the disorganizing effects of individual action, the constant flux of interpretation, and the powerful interaction of memory and social relationships, and knowledge as a cultural resource. *Balinese Worlds* is a unique contribution not only to Balinese studies but also to the theory and methods of the anthropology of complex societies.

Ogoni's Agonies - Abdul Rasheed Na'allah 1998

The book offers a wide range of perspectives on the crisis. It includes detailed historical analyses of the Ogoni people, of Nigerian politics, and of the international responses to the Saro-Wiwa execution. It also includes a strong body of critical responses to the work of Ken Saro-Wiwa, and to his importance as a Nigerian intellectual and activist.

Climate Change and Disaster Risk Management - Walter Leal Filho 2012-08-10

□ There has been some degree of reluctance in the past to consider disaster risk management within the mainstream of adaptation to climate variability and climate change. However, there is now wide recognition of the need to incorporate disaster risk management concerns in dealing with such phenomena. There is also a growing awareness of the necessity for a multi-sectoral approach in managing the effects of climate variability and climate change, since this can lead to a significant reduction of risk. This book presents the latest findings from scientific research on climate variation, climate change and their links with disaster risk management. It showcases projects and other initiatives in this field that are being undertaken in both industrialised and developing countries, by universities and scientific institutions, government bodies, national and international agencies, NGOs and other stakeholders.

Finally, it discusses current and future challenges, identifying opportunities and highlighting the still unrealised potential for promoting better understanding of the connections between climate variation, climate change and disaster risk management worldwide.

Northern Nigeria's Boko Haram - Jacob Zenn 2012

This report addresses the regional ramifications of the rise of Boko Haram and evaluates the jihadist terrorist organization as something more than a domestic Nigerian movement. The report discusses Boko Haram's regional connections and the possibility of it expanding throughout West Africa. The architecture for Boko Haram to become an al Qaeda wing in West Africa or part of a regional terrorist movement may already be in place. The Movement for Oneness and Jihad in West Africa (MOJWA) shares the same goal as Boko Haram and is also dominated by Hausa speaking members. Armed with weapons from Libya's caches and possessing operational ties to an Algerian-based al Qaeda faction, MOJWA may be the link between Boko Haram in Nigeria and a broader Boko Haram regional movement. The expansion of these terrorists in West Africa, and the possibility of Boko Haram franchising, could present a future threat to Western business interests in the area and undermine the region's fledgling democracies.
